

Plane Simple Ka

Proven, reliable global GEO satellite inflight connectivity

Gogo's Plane Simple Ka-band Advanced Tail Mounted Antenna (ATMA) system is your gateway to reliable, global high-speed connectivity via the Viasat Jet ConneX service. Designed with an advanced tail-mount configuration, this system features only two Line Replaceable Units (LRUs), streamlining installation and configuration while offering a seamless and cost-effective upgrade path as satellite technology evolves.

CONFIDENCE

- Aviation grade equipment and support
- Backed by the industry's premier customer support team comprised of global aviation professionals who are available 24/7/365
- Powerful real-time connectivity insights and system monitoring
- Dedicated team of technical solutions managers ensure you harness the full capability of our systems

MULTI-ORBIT BENEFITS WITH GOGO

Pair a Plane Simple GEO satellite system with the Gogo Galileo LEO Satellite antenna for complete global coverage and unrivalled peace of mind through system and network redundancy.

Only Gogo gives you access to complete high speed broadband internet coverage no matter where in the world your flight path takes you. Streamlining operations through one provider for consistency in coverage, billing, connectivity insights and access to the industry's top customer service team for nose to tail personal support.

PERFORMANCE

- Dependable high-speed connectivity worldwide
- Built for mid to large business aircraft
- Powered by Viasat's JetConnex network – Geosynchronous Orbit (GEO)
- Consistent performance from taxi to touchdown
- Global coverage
- Provides ability to stream, use cloud-based applications and perform large file transfers

FUTURE READY

- Designed for a seamless and cost-effective transition path as technology advances
- Flexible system that can adapt to future network changes
- Ability to operate on different networks, protecting your investment across future network advances
